Ms Elizabeth West
Town Planner – Haddam
30 Field Park Drive
Haddam, CT 06438

Dear Ms. West;

It is my understanding that the town of Haddam is considering a water main extension from its current terminus in Chester to the Tylerville section of Haddam. Chester is very supportive of Haddam's efforts, as there are several Chester parcels located along the proposed extension currently served by both private and public wells that have documented contamination issues.

Considering an extension of the water main solely to meet the needs of the parcels located between the current terminus and the town line has historically been cost prohibitive. It is my great hope that a viable solution can be reached by combining the needs of our two communities into one, much needed, infrastructure project.

Please keep me informed on the process you are undertaking and let me know how I may be of further assistance.

Kind Regards,

Thomas E. Marsh
First Selectman, Chester
